AVANZA CO₂: INNOVADORAS HERRAMIENTAS TIC PARA EL ESTUDIO, EVALUACIÓN Y TOMA DE DECISIONES SOBRE ALMACENAMIENTOS GEOLÓGICOS DE CO₂

Spanish project related to CCS Technology and the application of ICT (information and communication technologies) to select and characterize potential areas and structures to store CO₂.

Storage areas/structure. Grey cells indicate	
table 2 and 3 to see the values assigned	
to each criterion. Grey cells indicate	
the criteria which are measurable	

involves conducting all the pair-wise comparisons between the criteria at the same level. All the criteria considered in the same level are compared with respect to the same criteria on the previous level. It is a process proposed in the AHP methodology in which the criteria are compared in pairs, which fulfil the reciprocity and consistency conditions.

e techniques criteria (2nd level)

Criteria				
Geology	CO ₂ State	Other formations	E-values	Weights
4.59	5.03	8.55	0.44	
2.08	2.95	3.89	0.00	
1.30	1.43	2.43	0.13	
1.00	1.10	1.87	0.10	
0.91	1.00	1.70	0.09	
0.53	0.59	1.00	0.05

Presentación

Bienvenidos a la
visión técnica
Almacenamiento
almacenamiento geológico.

The Facebook page for Avanza CO2 features a cover photo with a blue sky and clouds. The page title is "Avanza CO2". It includes links to "Cambio climático", "Geología", "Química", "CH4", "CO2", "Gas", "Oxígeno", "mitigación", and "captura". A central image shows a brown cube labeled "CO2". The bio on the page reads: "Avanza CO2 está en Facebook. Para conectar con Avanza CO2, regístrate hoy en Facebook." The page has 2 likes and 1 person talking about it. There are buttons for "Me gusta" and "Entrar".

The position of the *WEB searchers* is relevant: you can find it if you look for it
(i.e.: Avanza + co2 // avanza + captura + almacenamiento + co2 // ...)
